

Welcome to our science lab! We experimented mixing with lots of dry materials such a rice flour etc. as we used little air puffers to create clouds of dust. Lots of opportunities to see what happens to our concoctions when water is added too. We observed some slides through a microscope and recreated our very own microbe pictures using our fingers. A soggy day collecting brambles which we add ed to our frozen bananas to invent our very own ice-cream flavour after reading our book of the week 'Gorilla Loves Vanilla'. We even got to operate the blender. Such noisy, tasty fun!
