

Welcome back! What a great start and busy week we have had to the new nursery session. We are learning all about our harbour, the fishing industry and the roles of some of the people within it. We had fun in our fishmongers role play area where we counted out the number the fish on the shopping lists and the number of pennies to buy them. We took a walk to the local harbour and little beach there looking at all the different seaweed types of seaweed we could find. We brought some back to school to explore and investigate as we cut it up etc. We followed this activity up by looking at a video of the process of making Nori sheets for sushi. We then made our very own veggie sushi for a tasty snack giving our fine motor skills a workout.
