

A visit to the wee shore this week to float our boats. We observed what happened when the waves washed in and out. Oh no! the boats are going to float away. We dug out the sand using a spade to create a safe harbour. Our observations then showed that when the waves re-ceded back the boats safe were left within the harbour walls.

There were lots of number games and activities thorough out the week reinforcing our number skills as we counted, matched and sorted and ordered. The favourite was definitely searching for the metal numbers in the aqua beads using just our feet before placing them on the correct space on the number line.

Enjoying our book of the week by the river we used our super construction skills to make a fishing rod out of a sticks and used a pine cones as a weight. We fished by the rive in in hope of catching a fish but instead we caught some funny fish just like the characters in the story. Also this week we used a selection of fruit and made fun boats for a healthy snack.
