

Lot's of spooky goings-ons at nursery this week as we prepare for our Halloween celebrations. The children helped to decorate the nursery classroom and house corner and set up a witches kitchen in the water tray where we experimented with lots of potion making using the 3 primary colours and observed the changes made. We acted out real life scenarios as we went trick or treating in the home corner and moved our bodies in various ways during Halloween themed yoga sessions. The children made some super spooky crafts and especially enjoyed using the foot pump to blow up their balloon ghosts before we took them out for a Halloween walk. Lots of sensory fun challenges from pumpkin smashes to the slime tub, where the children had to lift out the Halloween items using only their feet. It was disgusting! We made skeleton night lights using our super cutting and paper folding skills to take home and give our family a spooky fright!
