

This week we worked well together to make some fat ball bird feeders for our hungry feathered friends. This was super sensory fun as we crushed the ingredients through our fingers before adding some lard squeezing and squelching it all together before rolling into balls. Once they hardened in the fridge we went out into the community and chose where we wanted to hang them. Have a look if your out and about to see where we put them. The end of the week saw us visit Campbeltown Picture House for the last of the ELC visits in our school animation project. This session focused on model making and we were very lucky to have tuition from world renowned model maker Jim Parkyn from Shawn the Sheep fame. We had the opportunity to use lots of technology to create our stop motion movie using the characters we created. This was so much fun and here at Carradale ELC we believe we have some future movie directors and film makers in the making.
